

FLOOD WATER PUMPS

Coombe Bissett and Homington have some floodwater pumps, which are available for community use by any Coombe Bissett or Homington resident that has the need.

There is one large pump which is petrol powered and for outdoor use such as draining flooded areas of land and roads that are threatening local houses. It is capable of removing large volumes of water.

In addition there are two smaller electric pumps suitable for pumping out flooded rooms and basements etc. Both pumps are equipped with related essential equipment. If anyone would like further information or would like to use the pumps please contact the flood warden:

david.parson@gmail.com

or the parish clerk parishclerkcoombebissett@gmail.com

In emergency please ring David Parson on 07831 486080

The purchases of the pumps have been made possible by a grant from SSE.

Local residents have confirmed that all works well
